And then I will use the information read to calculate the mean and standard deviation of the team points. After I get the results in the end of the script, I have to print it to the output file. The information from the input file :

name	points	Spirou	41.75
Switzerland	40	South Africa	39.75
Thailand	39.25		

An example of what the output file should be like : Mean = 40.25 Average = 41.75 Std. deviation = 2.3888807763

The code I have so far :

```
#!/bin/bash while read name points ; do echo $points echo $name
```

hi hi Hi, I'm Jo, otherwise known as 'maash' (pronounced 'maash' like 'bash'). I'm a freelance designer, photographer, writer and stylist who has had a love of all things creative since I was a toddler. I'm a lover of all things design, retro, vintage and functional furniture but my favourites are florals and anything with that soft, girly charm. I believe that no matter

what age you are you can still
decorate your home in a way that
feels soft and fun. A few things I like...
