FIFA is the leading sports franchise in the world, with over 200 million players and more than 500 million total in annual active gameplay. It has become the benchmark for sports gaming on consoles and PC, has won more awards than any other sports game, and has inspired a generation of gamers who continue to enjoy the FIFA experience today. FIFA is the complete video game package that lets you experience all the pleasures of the beautiful game in four ways: Online, on consoles, on PC, and on mobile. FIFA 17 EASILY the best FIFA to date FIFA 17 easily the best FIFA to date, the game comes packed with tons of new features, from the much requested player traits to new game modes and player makeovers. The game also offers a wealth of new and improved gameplay elements including a brand new press X button, taking over for the previous standard X/square button interaction. The new changes also made it easier to score goals and harder to defend against the opposition. FIFA 17's new Skill Stick button system allows players to perform fast, creative manoeuvres with the press of one button. Essentially the same as the classic X button, the Skill Stick allows players to quickly whip the ball into space and then switch direction with ease. This can be performed with one button on either foot, and includes both freestyle and stick-controlled moves - making the control system far more accessible and more responsive than before. A brand new close control system was also introduced, which lets players choose the speed and distance of passes, crosses, and

shots by adjusting their control inputs. The new control system was developed in conjunction with EA's FIFA, PES, and Madden NFL franchise developers to provide the ideal balance of responsiveness and quality. This change will make for a more natural and smoother control experience, even for players used to classic X button controls and the ball control system from FIFA Ultimate Team. FIFA 17 also offers a host of new types of Attacking Midfielders, Defenders, and goalkeepers. The new Attacking Midfielder has an arsenal of attacking tools at his disposal, and is adept at spraying the ball into space and finding open teammates thanks to his range of skill moves. Defenders can now choose between attacking and defensive positioning, while goalkeepers have access to new pass control options to make the game more tactically challenging. Players can now change their game appearance
