For more details on the FIFA 22 free-to-play FIFA offerings, please visit the FIFA website. FIFA Ultimate Team "This year, we wanted to offer something different to the Ultimate Team community," said David Rutter, Executive Producer, FIFA Ultimate Team. "Since the launch of FIFA 18, we've seen an overwhelming response from fans wanting a new, more engaging and exciting way to build and manage their favorite teams. FIFA 22 introduces an all-new way to play in conjunction with the FIFA Ultimate Team experience, giving players new strategic and tactical gameplay options, and creating unprecedented gameplay experiences for our fans. We're pleased that fans will have the chance to experience HyperMotion Technology as it's only a first step in our discussions with developers about a possible franchise mode." FIFA Mobile "We are thrilled to be able to continue to provide fans with an authentic experience and the best gameplay possible in Mobile FIFA 22," said Mike "Milyo" McNamara, Senior Producer, FIFA Mobile. "Collecting authentic gameplay data is a key objective for us at EA Sports and FIFA 22 is the first time we have so much data gathered from such an extensive range of players from

#### Features Key:

- **The Journey:** New game engine delivers unparalleled realism and attention to details as the game recreates the authentic match style and looks of the sport. Attribute and set up your team to feel, move and play like you. Use real-world motion data from players such as Ronaldo, Neymar, Messi, Iniesta, Buffon, Wendel, Beckham, Kaká, Drogba, Ba, Henry, Kanu, and more to help define and customize the player to improve the way that you interact with the game.
- **Magnificent Matchdays:** Score goals and add goals with your favorite real-world players, all with a full depth of social aspects to add to the matches. Clubmate relationships improve as you advance, with FIFA 20 introducing a new set of weekly and daily objectives, allowing for dynamic matches that evolve over time.
  - **Soggy Pitch:** On the pitch, debris, mud, grass, snow, fire, spray paint and other elements add to the authenticity of a soccer game.
  - **Passing Theater:** Realistic passing dynamics bring to life the unique feel of passing in football. Passes are more accurate and pack more control, while the all-new Sprint and Pass animations create a more authentic soccer experience.
  - **Move. Damage. Star:** Mobile and aftertouch responsiveness creates a more fluid and authentic soccer experience for players. Whether passing or shooting, rebounding or attacking, your moves are all tracked in real-time and count in real time.
  - **Head Control:** Heads up, give and go, diving, and over-the-top action have never been more realistic.
  - **The Bigger Picture:** Step back, shift your view of the pitch, and see the whole match. Created for both 1st and 3rd person perspectives, the new Match Day View, camera, and the abilities to step back and watch a match unfold in up to 4K in full-HD and 5.1 surround sound, brings to life the unpredictable nature of a football match.
  - **FIFA Pack (4K Player add-on)** adds to the game full, motion-captured likenesses of Ronaldo,

#### Fifa 22 PC/Windows [April-2022]

In FIFA, the entire world comes to life from dusk to dawn with the day-night cycle, while the scenery, crowd behavior, pitch type, day and season transitions and weather all look spectacular, providing a true-to-life soccer experience. FIFA's comprehensive online platform leverages EA SPORTS Football Club, enabling you to connect, compete and share across connected platforms, while the all-new social features include dynamic social polls and interactions, as well as the ability to promote your club and players directly to friends. FIFA is about more than just playing soccer - it's about experiencing the sport through the eyes of the fans; it's about sharing, competing and connecting. Features MOTION AND FOCUS The most realistic player movement in the history of EA SPORTS FIFA delivers unprecedented animation and responsiveness, and true-to-life ball physics and play mechanics. Refocused tackling and physicality has been increased, while using the D-pad and analog sticks to manipulate the ball and skills has been improved. In the blink of an eye, players can now go from the top of the penalty area to the bottom, and dummies in the wall help with the transitions from one pass to the next. On the pitch, players must focus on the ball and opponents to dodge and anticipate, every decision and movement now has a consequence. COLLISION EA SPORTS Football Club delivers the most comprehensive and detailed set of real-world data for player collision detection in FIFA history, ensuring that players are hit by and collide with opponents with greater accuracy. Updated player collision detection means that every collision, every tackle and every push has its own force and effects on players and opponents. A player's hitbox has also been reworked, delivering more accurate and realistic two-footed tackling. Offensive players can choose their angles and see the positioning of their opponent in order to anticipate and react faster. Teams also have more options when dealing with a penalty kick or free-kick, while the injury system has been adapted so players are more likely to be injured when they make contact with the ball or the surrounding players, making it more stressful to play as a defender. The ball physics and responsiveness of the ball is also improved, which bc9d6d6daa

Football is unlike any other sport, not just because it features a player having 10 little limbs, but because football comes alive in a way unlike any other game. Watch a match for 15 minutes and you'll see a brilliant player score a goal, be fouled, weave away through the midfield or as the ball lands at his feet, hit a perfect pass to a team mate who scores. The difference between a great player and an average one is that it takes an average player minutes, minutes of practice and repetition to master a single skill, whereas a great player can do that in seconds. FIFA 22 is packed with new features that make your average match feel more realistic, from the way you build your team, to how your team plays together, to how you manipulate the atmosphere in a stadium, to how you manage the tempo of a match. We also have players who develop and grow, new ways to score goals, new ways to pass the ball and more. New Features for FIFA 22 FIFA Football Phenomenon FIFA Soccer is most often described by the size of your pitch. In FIFA 22, the pitch is also the board on which you play. In FIFA 22, the size of the pitch means everything. Create a perfect strategy for an opening kick-off - make the pitch the length of a field-hockey rink - by adjusting the pitch's surface and get it wrong and try to mop it up! You'll be forced to switch to matches where the pitch is shorter, and you'll be amazed at how different the action and strategies look. FIFA Football of the Future The pitch is big enough for a stadium to house tens of thousands of fans. Watch the next World Cup live in stunning 4K Ultra HD, or experience the most realistic simulation of a game ever, with FIFA Play and live events from the most prestigious leagues like the English Premier League or Liga MX. Delivers a New Feel for Attacking Attackers now have two new tools to help them score goals. New dribbling control brings a host of new tricks and skills, from controlled slides to running off the back, while high-speed sprints give attackers new opportunities to take a shot on goal at speed and shoot for a winner. New Player Builds, Tactics and Movement New Player Builds & Tactic Implementation The emphasis on building and managing your team has shifted. In FIFA 22
