Autodesk Autocad 2012 Portable Compalite (XP,WIN7 32 Bit).Q: How to make a search function use case insensitive I have a search function which searches for a single term in a string. However, the search only occurs case sensitive. For example, 'a' and 'A' are both matched to 'a', but not if they were in different sections of the text, for example, 'ac' and 'ca'. Is there anyway to modify this search function to make it case insensitive so that if a and A were in the same document it would match?
