ASP.NET MVC has gained broad adoption in the industry, and we're happy to be able to showcase a wide variety of applications built with this framework. The intent of this podcast is to provide an in-depth look at different applications built with MVC, as well as to share some opinions on best practices for building web applications today. 2.1.2, or is that 2.1.1? I don't know. Both versions seem to work fine, and the 2.1.2 source is available in the official nuget package... Although 2.1.0 comes with a new Omni-Channel framework that integrates everything you need to start building a full-scale and responsive website including the new BlazeJS. The only thing that comes with this release is Omni-Channel, but there are a bunch of useful and powerful enhancements that set Omni-Channel apart from the rest. Be sure to check out the new sample app, which contains live demo of: - Client-Side Omnichannel Rendering, Channels and Visual Components - Universal Support - CDN & Cache Oriented - Highly Scalable - Robust & Extensible - Built with ReactJS and SvelteJS Here is a quick video and a summary of the highlights of the 2.1.0 release: [Video Summary] I'm in a position where I have a different build file
