Clean Paste For Windows 10 Crack is a simple Windows tool that allows you to "clean up" the contents of the system clipboard. Simply right-click on the Clean Paste Serial Key icon in the task tray and select "Unload from memory". The Clean Paste application will then appear in the tray once again, ready to clean up the contents of the clipboard. Usage: Simply click on the icon in the tray and then in the "Preview" window (or use Ctrl+V), to clean up the contents of the system clipboard. You can also use the following keyboard shortcut: Alt-C I suppose this is only really needed when using an alternative keyboard layout, such as US English. Finally, Clean Paste works only for the system clipboard - it does not affect the clipboards of any other applications. Warnings: The tool adds a nag message to the clipboard text, which is intended for information only, but to the rest of us can be annoying. The program does not actually clean the clipboard, it has a readme that explains the purpose of the nag message. Other than that, I found it to be very useful and much quicker than manually editing the clipboard. I use Clean Paste all the time in my own programs and in most cases after the paste the text will be clean, although when I copy formatted HTML it's a bit hit-or-miss. Must be stopped before installing other programs. File->Application->Clean Paste. Otherwise you'll be punished with a nag message when you try to paste. Keeps recurring until you tell it to quit. For similar reasons I use Quick Windows Plus. (I do not recommend SciTE.) I like to use Clean Paste! It is a little slow if you have a slow PC, but it is very helpful! You can also use Clean Paste while the program is closed, but not as efficient. This program is very helpful in my Notepad++ editor! Another one of my favorites. Saved my life.... My problem was when using pasting code I would keep getting an error message in the bottom left corner of the screen. Every time I closed Notepad++ I would have to cancel the autocorrection! This program helped me! It cleans what's in the clipboard and lets you paste it. It's very useful. Another one of my favorites. Have been using Clean Paste for years - a bit slow with heavy clipboards, but excellent. I use b7e8fdf5c8
