

In this article we will discuss how you can enable or disable an internet connection sharing in Windows 10 using NetSharing on Windows 10 Pro/Enterprise. Under Networking, you will see an option called "Internet Connection Sharing". Here you can enable or disable it and it can be managed easily with an app called Connectify Hotspot Shield (Mac) (Windows 8 / Windows 7). If you are looking to share your home broadband connection, this option can provide you the same functionality. Here I will discuss enabling or disabling the Internet Connection Sharing

(ICS). Enabling internet connection sharing in Windows 10 Open the Charms bar, type “Network and Sharing center”, click on the Network and Sharing Center. Click on “Change Adapter Settings” option. If your ISP has chosen to enable this option for a particular adapter and a mobile broadband connection is available, then a virtual network adapter named “Broadband Internet Connection Sharing” will appear in the list. This adapter lets you share your broadband internet connection with other computers connected to the same router (or other devices which are connected to the router). This is a virtual adapter which can be

managed in the same way as other adapters. How to disable internet connection sharing in Windows 10

Open the Charms bar, type “Network and Sharing Center”, click on “Change Adapter Settings” option. If there is a virtual network adapter named “Broadband Internet Connection Sharing” or “WLAN internet connection sharing”, disable it. How to enable internet connection sharing in Windows 10

Open the Charms bar, type “Network and Sharing Center”, click on “Change Adapter Settings” option. If there is no virtual network adapter named “Broadband Internet Connection Sharing” or “WLAN internet connection

sharing”, create one. Total changes
Using the above methods, you can
enable or disable internet
connection sharing on Windows 10
easily. More by this Author
