What's new in Fifa 22:

-
- **AI advice - Max let's you fine-tune three of the main aspects of your team's AI, Attack, Defence and Attacking. Before, you needed to fine tune only one at a time.**
 - **Goalkeeper AI - Your goalkeepers will now react in a more natural and realistic way after a save. If a goalie saves straight into a teammate's feet, for instance, that player could very well power play or switch off during the subsequent corner.**
 - **Goalkeeper positioning - Your goalies will now play on the goal line when defending set-pieces, and they'll try to prevent the ball being played out from offside.**
 - **Misc. gameplay improvements - Fixing a number of gameplay issues was a big part of this year's campaign. We've also made token and goal celebrations easier to set up and add variety to the game. Tokens are now colour coded for easier identification and animations have been improved - the ball is now brought to the feet of the players more realistically, collisions are deeper, and now players bump into each other more naturally.**
 - **Tournament mode - You can now play multiple seasons of your favourite major tournaments. These now span multiple years, meaning you'll have the chance to play through some epic matches along the way.**
 - **Keeper replays - The ability to save and replay any of your goalkeepers match has arrived.**
 - **New Nintendo Switch Pro Controller enhancements - A total of nine enhancements, including "Ball Hold" and "Detach Attack" modes, have been added for the new console, letting you do more in-game action.**
 - **3 more Vision Pro players - Don't you just love FIFA Ultimate Team?**

-
- **Over 30 brand new players, all the way from Brazil, France, Spain, Germany and many more nationalities.**
 - **Over 300 cards, including new cards like long-snapper Thierry Henry.**
 - **Additional female faces, hairstyles, and body styles for all major national teams. Look out for Ronaldo, Lionel Messi, Wayne Rooney**
