The kit of your choice can be turned into a real-life replica of your favourite players “by selecting from large numbers of different models, sizes and colour variants of the same player,” according to EA Sports. The kit creator and real-life version of the player can also be unlocked to use in game on the buy mode in which you can create your very own player and kit. In a twist on previous games, custom-made players will feature on the official new FIFA 18 cover star list, The 25 top players for FIFA 18 are determined by a combination of video analysis, fan voting and EA Sports editorial and creative content teams. The video player will be a fan exclusive for FIFA 18. See What's New for FIFA 18 on the FIFA 18 Hub FIFA 18 for Xbox One, PS4, PC, Mac, PS3 and Xbox 360 FIFA 18's demo will be available on PlayStation Store and Xbox Live from 30 September. Xbox One and PS4 players will also be able to sign up to EA's new beta program, FUT Champions, with beta keys on offer from the same platforms. EA Games VP of sales and marketing, Richard McDaniels, has hinted that more games from the series will be heading to the beta program, with FIFA 16 and Madden NFL 17 coming to the program earlier this year. The overall goal of this project is to provide a more precise understanding of the how the body responds to exercise when a person is attempting to maintain his or her stable body weight. Physical activity (PA) recommendations have recently shifted from those based on indirect, relatively imprecise calculations to those based on direct, more precise measurements of energy expenditure (EE). We plan to achieve this goal by determining the degree to which body weight (BW) changes when a person is sedentary (SED) versus being active (ACTIVE) by using doubly labeled water (DLW). DLW is the gold standard method for measuring EE. The scope of the project includes: 1) a 7-day open-label clinical trial to obtain SED versus ACTIVE day measures of EE with DLW, 2) a 12-week supervised weight loss study to determine how the steady-state daily rhythm of EE evolves as a function of the time of the day, 3) a clinical study to determine how the steady-state levels of BW, as determined by DLW, and other body composition variables are affected by conditions known to affect PA, and 4
